

Photocatalytic processes for water treatment based on TiO_2 – Graphene Oxide hybrid nanostructures

报告人

Prof. Abdel Hadi Kassiba

报告时间

2024年12月16日 下午14:00~16:00

报告地点

嘉定园区G3第一会议室

A.Kassiba is distinguished professor in Le Mans University, director of Physics department and a senior researcher in the Institute of Molecules and Materials (IMMM) (UMR-6283). The main research contributions are developed on spectroscopic investigations of nanomaterials and nanocomposites based on the wide bandgap semiconductors such Silicon carbide for electronics, nonlinear Optics and Electrooptics.
